Dear Friends & Supporters,

Greetings and peace be upon you.

With your generosity and support and the dedication and tireless efforts of our staff worldwide in 2013, Mercy-USA was able to make a difference in the lives of over 250,000 vulnerable persons in the Balkans, East Africa, the Middle East, South Asia and the Far East.

The year 2013, our 26th year of service to humanity, was one of expansion and tragedy. The year began with the expansion of our operational presence inside northern Syria, securing the daily food needs of over 5,000 at-risk persons in Aleppo and the surrounding area, but ended with the tragic loss of Abir Al-Shab, our field team leader in that same city.

As an organization, we had been spared this kind of tragedy until that fateful day on December 23, 2013. Despite our history of providing relief and comfort to children and their families in some of the most dangerous places in the world, our dedicated staff, knowing the risks, had, with the mercy of God, been blessed to accomplish our mission in relative safety.

Abir, like all of our staff worldwide, had dedicated her life to the service of others and made the ultimate sacrifice doing so. We pray for her kind and gentle soul and ask that you continue to remember and honor her sacrifice as well.

Sincerely,

Umar al-Qadi
President and CEO
By the end of 2013, there were at least 6.45 million internally displaced people inside Syria. Other U.S. government reports show there were 9.3 million people in need of humanitarian assistance within Syria’s borders, and 2.8 million Syrian refugees who had fled to neighboring countries.

The situation for the Syrian people becomes more desperate by the day as access to food, and medical services and supplies becomes scarce due to the deadly armed conflict.

Since October 2012, Mercy-USA for Aid and Development’s Syrian relief workers have been providing consistent and reliable food aid inside Syria. During 2013, we provided at least 1,000 displaced and vulnerable families with monthly food baskets and infant formula in and around the city of Aleppo - including the neighborhoods of Al-Marjeh, Aqyoul, Bab El-Nayreb and Azmarin (a locality in Idlib Province not far from Aleppo City). Activities in Azmarin had to be halted in early September 2013 due to security concerns, allowing more families in Aleppo to receive the food aid instead.

**Every food basket delivered in Syria contained the following commodities for survival:**

- Rice: 11 pounds
- Bulgur Wheat: 11 pounds
- Sugar: 6.6 pounds
- Olive Oil: 2 Liters
- Corn Oil: 4 Liters
- Tomato Paste: 2.2 pounds
- Chickpeas: 2.2 pounds
- Lentils: 4.4 pounds
- Pasta: 5.5 pounds
- Salt: 1.7 pounds
- Tea: 1.1 pounds
- Halva: 1.4 pounds
- Thyme: 2.2 pounds
- Jam: 1.9 pounds

*UNOCHA

**Every 2 minutes 8 children inside Syria are forced to flee their homes.**

---

6.5 Million Internally Displaced Persons

9.3 Million Syrians were Need of Aid

2.8 Million Syrian Refugees in Neighboring Countries

---
The Wadi Khalid region is an already impoverished mountainous region of Lebanon bordering Syria reeling from an influx of thousands of Syrian refugees. The region lacks adequate medical services, and the refugee crisis has strained the Wadi Khalid health service infrastructure beyond its capacity. In 2013, Mercy-USA addressed these serious threats to the refugees and their host families’ health and well-being by providing health services to over 8,000 Syrian refugees, including delivery services for pregnant women.

Since February 2012, Mercy-USA has funded a mobile clinic operated by Makassed Charitable Organization that travels four days per week to villages in Wadi Khalid where local families are hosting Syrian refugees. This modern mobile clinic provides disease-preventing vaccines, pre- and post-natal care, and regular medical exams.

In Wadi Khalid, the closest hospital is a 30-minute drive away on poorly maintained roads. Mercy-USA has repaired and rehabilitating the stationary health clinic serving the Wadi Khalid region. By modernizing and improving the clinic, operated by Makassed Charitable Organization, the locals and Syrian refugees now have better access sorely needed basic emergency health services. Labor and delivery services are offered to unregistered Syrian expectant mothers at the clinic. In 2012, Mercy-USA purchased an ambulance to serve the villages of Wadi Khalid, providing comprehensive and emergency transportation and medical services.

BREAD DISTRIBUTION TO THOUSANDS

Bread is a basic life-sustaining staple in Lebanese and Syrian homes. Mercy-USA is currently covering the daily fresh bread needs of about 15,000 vulnerable Syrian refugees and their Lebanese hosts in Wadi Khalid, Lebanon, as well as about 6,000 Palestinian refugees from Syria now living in Lebanon. Fresh bread is distributed three times a week to 11 different distribution points in the Wadi Khalid region and once a week in the Beddawi Palestinian refugee camp.

At the end of 2013 there were 858,000 Syrian Refugees living in Lebanon.*

*UNHCR
Mercy-USA for Aid and Development has been installing and rehabilitating water wells throughout Somalia since 1997. To date, communities in Somalia with a combined population of over 550,000 people have safe access to clean water thanks to the generous support of our donors. In 2013, we dug 23 new wells with the generous support of private donors and rehabilitated 18 other wells with funding from the US Agency for International Development’s Office of Foreign Disaster Assistance (USAID/OFDA).

Many Somali women and girls must walk up to 6 miles to get water in dangerous conditions. Mothers are forced to leave children unattended to fetch water, and walk long distances while carrying heavy water cans leaving them vulnerable to attack from strangers or wild animals. Young girls, often responsible for this task, are too exhausted from a half-day journey in the hot African sun to attend school. Both girls and women are at risk of having their water stolen from them as they trek back home, or find it contaminated by grazing animals allowed to water at the same source, causing dehydration and death from diarrhea and cholera. Well construction, conducted by Mercy-USA with funds provided by private donations, has changed the lives of tens of thousands in Somalia.

Working with the Communities We Serve
Mercy-USA field staff come from a similar or the very same cultural point of reference as the people they are serving in Somalia, making them best suited to aid in the lasting development legacy of a life-sustaining well. Our staff identifies a community that is in need of a well and ensures that the community is willing and able to take on the responsibility of maintaining the new water source. Once the assessment is made, field officers work with the community members to involve them in the details of the well construction and all possible future management demands. This initial component of community ownership of the well-to-be is a critical element for sustainability of the water source. The community is closely involved in site selection so that the well will safely serve the needs of the entire community, especially women and children, far into the future.

Education and Leadership Training
After a well is dug or rehabilitated, Mercy-USA’s responsibility to the community is not complete until we conduct comprehensive training on maintaining sanitation for the continued health of the community. We also teach how diarrhea and other waterborne diseases are spread and how to break the chain of contamination and prevent re-occurrences. We help the community learn how to manage and treat diarrhea by instructing them on how to safely prepare and use oral rehydration solution from various sources.

Somalia has one of the highest infant mortality rates in the world. It is believed that contaminated water resulting in waterborne disease is the second leading cause for death among children under five in Somalia. According to UNICEF, only 30% of Somalis have access to safe water and this situation only increases the risk of outbreaks of waterborne diseases. Cholera is endemic and claims hundreds of lives annually, particularly in densely populated areas. A nearby source of clean water restores health to a community and brings hope and dignity back to the lives of women and children in Somalia.
Tuberculosis Treatment and Prevention

In Somalia, tuberculosis (TB) is a serious public health problem and is one of the most common communicable diseases in the country.

Since 1994, we have been conducting a well-recognized TB treatment and prevention program in Somalia. This program consists of six Mercy-USA specialized treatment centers with public education and community outreach. The program also includes training of nurses and other health care professionals in TB treatment and prevention.

During 2013, these six centers, treated approximately 1,450 TB patients, and saw a cure rate of 86% in the patients that completed the 6-9 month treatment plan. Mercy-USA utilizes the most effective TB treatment strategy, the Directly Observed Treatment Short-course (DOTS) method. In addition to treatment, our centers educate their local communities about TB prevention. The Global Fund to Fight AIDS, TB and Malaria (GFATM) supports our TB treatment and prevention activities.

With the support of UNICEF and GFATM, Mercy-USA’s TB centers are also providing HIV/AIDS and STI testing, treatment and counseling. Two of our centers also test donated blood for HIV, Hepatitis and STIs.

ALBANIA EDUCATION PROJECTS

In the early 1990’s Albania emerged from decades of communist rule; since then the nation has been struggling to transition to a more modern open-market economy, and remains one of the poorest countries in Europe.

Since January 2009, Mercy-USA for Aid and Development has been providing three-month computer office software and English language training courses to orphans in Albania.

“Read To Succeed!“

As Albania emerges from the legacy of communist rule, free access to information through the printed word is still lacking. Since 2011, Mercy-USA has been assisting schools in Albania to open or expand libraries, providing almost 10,000 students with over 10,700 new books.

During the 2013-14 school year, a total of 12 elementary, middle and high schools combined were provided with over 4,300 new books (about 50 different titles). Almost 4,000 children attending these schools gained access to important reference material, novels, poems and short stories to broaden their horizons and encourage them to “Read To Succeed!"

SOMALIA HEALTH PROJECTS

The most innocent victims of war and environmental disaster are children and their mothers. According to UNICEF, Somalia has one of the highest child and maternal mortality rates in the world. One in eight children dies before reaching the age of five and 1,600 women die for every 100,000 live births. Other social indicators for children are also among the worst in the world.

Health and Nutrition Support for Somalia’s Most Vulnerable—Women and Children

Mercy-USA is currently providing nutrition support and health services for children, pregnant women and nursing mothers in Somalia. Mercy-USA, with the support of the United States Agency for International Development (USAID), the United Nations Children’s Fund (UNICEF) and the UN World Food Program (WFP), has set-up nine therapeutic feeding centers, six supplemental feeding centers and two stabilization/in-patient centers.

Therapeutic Feeding Stations

During 2013, over 9,700 children under the age of five suffering from moderate acute malnutrition (MAM) and over 3,260 suffering from severe acute malnutrition (SAM) were admitted into the selective feeding program. In addition, over 3,850 pregnant women and nursing mothers were also admitted into the program.

The children with SAM are given ready-to-use therapeutic foods like Plumpy’Nut weekly, while those with MAM are given UNIMIX biweekly; both are specialized food for malnourished children.

Disease Prevention

Mercy-USA is also preventing disease through the immunization of children and women, distribution of vitamin A and iron folate. Additionally, Mercy-USA distributed 2,500 hygiene kits - including 20-Liter containers for water collection, water purification tablets and soap - in 2013 to 2,500 families with children suffering from SAM admitted into the nutrition program. We also provided health, nutrition and hygiene education to vulnerable communities as an effective means of disease prevention.

Mother and Child Health Clinics

During 2013, Mercy-USA’s 13 Mother and Child Health Clinics (MCHs) received approximately 50,000 visits from women and children seeking treatment. These MCHs provided reproductive health services - including pre-natal, delivery and post-natal services - to approximately 10,000 women in their communities. Over 1,100 newborns were also examined and treated and immunizations provided to about 3,400 children under five.

Since 1994, we have been conducting a well-recognized TB treatment and prevention program in Somalia. This program consists of six Mercy-USA specialized treatment centers with public education and community outreach. The program also includes training of nurses and other health care professionals in TB treatment and prevention.

During 2013, these six centers, treated approximately 1,450 TB patients, and saw a cure rate of 86% in the patients that completed the 6-9 month treatment plan. Mercy-USA utilizes the most effective TB treatment strategy, the Directly Observed Treatment Short-course (DOTS) method. In addition to treatment, our centers educate their local communities about TB prevention. The Global Fund to Fight AIDS, TB and Malaria (GFATM) supports our TB treatment and prevention activities.

With the support of UNICEF and GFATM, Mercy-USA’s TB centers are also providing HIV/AIDS and STI testing, treatment and counseling. Two of our centers also test donated blood for HIV, Hepatitis and STIs.

Somalia

ALBANIA EDUCATION PROJECTS

As of December 31, 2013, approximately 720 orphaned Albanians have enrolled in and have completed these courses. Competitions were held to encourage retention of knowledge and gifts of clothes, watches and shoes were awarded in addition to the certificates awarded to all who complete the courses.

baseball
RURAL EDUCATION SUPPORT IN BANGLADESH

Poverty in Bangladesh has been significantly improved in the last ten years; however, much of this good news has not reached rural Bangladesh. According to The International Fund for Agricultural Development, IFAD, the poverty rate in Bangladesh is highest in rural areas, at 36%, compared with 28% in urban areas. Many people have an inadequate diet and suffer from periods of food shortages. Half of all rural children are chronically malnourished and 14% suffer from acute malnutrition.

Mercy-USA supported five rural schools and two orphanages in Bangladesh in 2013 by providing everything from meals, uniforms, teacher salaries and more. Boys and girls, who might not have had access to any education at all, are able to go to school and look toward a better future for themselves and their families.

The daily meals provided at the schools are often the only source of good nutrition these children have; Mercy-USA knows that learning doesn’t happen when a child is hungry.

The five schools Mercy-USA supports are run by our local partner, Assistance for Humanitarian Development (AHD), in Bangladesh. These schools - located in impoverished rural areas in the districts of Tangail, Rangpur and Mymensingh - are providing free education to over 1,600 vulnerable children, with girls representing about 55% of the student body. Mercy-USA's support includes the following:

- School lunches for the children
- Uniforms
- Education materials
- Teacher training workshops
- Sports activities and field trips
- Repairs and maintenance of the school facilities and furniture
- Salaries for all teachers and support staff

Together, Mercy-USA and AHD are helping these schools and communities by providing their children with, a safe and nurturing place to learn and grow with well-maintained school buildings, trained teaching staff, quality learning materials and opportunities for sports and field trips.

ROHINGYA REFUGEES

According to the UN Refugee Agency, UNHCR, 1.3 million Rohingya people in Myanmar (Burma) were either stateless or internally displaced within the country at the end of 2013. In 2013, tens of thousands fled violence and ethnic intimidation. Many made the treacherous land trek into India.

Mercy-USA, with our local humanitarian aid partner, the Foundation for Economic and Educational Development (FEED), helped 100 of these families when they arrived into the camp in Hyderabad, India. We provided “Fresh Start Kits” containing basic necessities for a family—some cooking pots, food staples like rice, wheat and grams, oil, a few rupees cash for daily fresh vegetables and milk for the children, plus hygiene items like tooth powder, soap and washing detergent, and finally, clothes to replace the only ones they carried into the country on their backs.

BOSNIA AND HERZEGOVINA

S
still recovering from the war that ended almost two decades ago in Bosnia and Herzegovina, the struggle with a poor economy and the devastating legacy of war has left many Bosnians without a clear vision for a better future. According to the latest report from the World Bank, Bosnia and Herzegovina has crippling high unemployment, especially among young people; the current unemployment rate among 15-24 year olds is staggering 47%. These numbers signal that the current labor market is offering few opportunities for secondary school graduates to find employment. Yet, the same report states that, “83% of firms have an unfilled need for workers, citing a lack of supply of qualified applicants as the reason for unfilled positions.”

Mercy-USA has been in the country working specifically with orphaned youth and at-risk teens and young adults to help them develop skills for gainful employment and a better future.

Adult Continuing Education and Training

Since 1998, Mercy-USA has been providing training to unemployed, or underemployed men and women in English and current, and in-demand office software.

This training gives the participants the language, office, clerical and computer skills needed to compete for gainful employment and is contributing to much needed stability for families and communities. Over 2,800 persons have graduated from this program, which also includes training in job-search skills.

Orphaned and At-Risk Youth and Young Adult Training and Mentoring

Since November 2010, Mercy-USA for Aid and Development has been providing three-month computer office software training courses to orphans and other at-risk teens and young adults in the Tuzla Canton of Bosnia. In addition to the technical training these young people receive, they are mentored by caring Mercy-USA staff members who teach essential life skills that will serve the students as they enter adulthood. Mercy-USA mentors provide character development training that teaches the values of honesty, hard work, and integrity. This character training encourages the at-risk youth and young adults to avoid criminal responses to hardship, and gives them confidence to join the workplace after their schooling is complete. The trainees are also provided with a nutritious meal or snack during each class; the extra nutrition provided helps them stay motivated and focused on their training.

As of the reporting period through December 2013, about 200 orphans and other at-risk youth have enrolled in and have completed these courses.

INDONESIA: ECONOMIC GROWTH AND INCOME GENERATION

Since March 2011, Mercy-USA for Aid and Development has been providing livestock, feed-production machines, rice, corn and sweet potato seeds, fertilizer, and training to farming families in three provinces of Indonesia. Mercy-USA is also supporting and assisting these farmers to form cooperatives.

These agricultural inputs and training are helping these farmers and their families to feed themselves and increase their production and income. As of December 2013, approximately 630 farming families (about 2,500 persons) have been supported.
GROWTH FOR THE FUTURE: AGRONOMIC AID AND DEVELOPMENT PROGRAMS IN BOSNIA AND ALBANIA

Sustained Agronomic Development—Bosnia

Since 1994, Mercy-USA has been working with and has impacted thousands of families directly through the distribution of agricultural inputs and seedlings, as well as the provision of technical training. In addition, thousands more have indirectly benefited through general improvements to the Brcko District’s environment. Mercy-USA has already helped returnee and formerly displaced families take an important step towards a return to self-sufficiency in the near and long term by facilitating the production of food at home.

The Agriculture Education Center (AEC)

Since 2007, Mercy-USA has been operating an Agriculture Education Center (AEC) in the Brcko District of Bosnia. This AEC is being carried out in cooperation with Brcko District authorities, who donated approximately one acre of farmland, and the Agriculture Institute of Sarajevo, which is providing technical assistance.

The AEC project, supported by Mercy-USA’s private donors, includes a 10,900 square-foot greenhouse and serves as a theoretical and practical training center for farmers in and around the Brcko District and students from the local agriculture school.

Local farmers and agriculture students are learning the most efficient methods to farm, and take those skills back to local farms where they implement what they’ve learned for the benefit of the local community’s economy.

In addition to providing help to farmers and agriculture students, the AEC completes the circle of support by distributing a portion of the seedlings grown in the greenhouse to area families who need assistance. Since 2009, Mercy-USA’s AEC has distributed over 93,000 vegetable and fruit seedlings to over 2,000 internally displaced families (about 6,000 persons) living in the greater Tuzla area. This innovative initiative provides a dignified means for vulnerable families to grow their own fresh and wholesome fruits and vegetables from the seedlings throughout the growing season.

Economic Growth and Income Generation—Albania

Since 2009, Mercy-USA, with support from a local milling company Miell Tirana, is assisting wheat farmers in Albania and Kosovo. The farmers are provided with seed and fertilizer, as well as technical training and business and marketing skills.

In 2013, 18 wheat farmers, their families and employees benefited from this program. They saw harvest and income increases of about 15% over the previous year despite adverse weather events. The participants’ harvest was about 60% higher than those of non-participating farmers in the same area. These projects not only assist the direct recipients of the agricultural inputs and training but also allow them to expand and employ more persons, increase their demand for services and products from local vendors, and, in general, help to stimulate the economy within their communities.

AID TO PALESTINIAN REFUGEES IN LEBANON

Since 2008, Mercy-USA for Aid and Development has supported vocational training for Palestinian refugees in Lebanon. The project, which focuses on orphans and other vulnerable youth and young adults, is being carried out in partnership with the Women’s Program/Community Development Centers in the Beddawi and Nahr Al-Bared Palestinian Refugee Camps near Tripoli.

The vocational training courses, which range in length from two to nine months each, include pastry and sweet baking, ice cream making, English language, photography and video production, office administration training, basic computer software, computer and cell phone maintenance, hair cutting/styling and sewing.

Trainees are also given workshops on important life and social skills (respect for time, goal setting, personal and family responsibility, etc.), career planning and resume and job interview preparation, as well as employment search counseling. Additionally, Mercy-USA has provided the women’s centers with electric generators, computers, other office equipment, heat/air-conditioning units, and supplies specific for the training courses.

In 2013, approximately 100 Palestinian youth and young adults successfully graduated from the various training programs.

In addition, Mercy-USA supported the Eid holiday celebration carried out by the Nahr Al-Bared Women’s Center for children. The celebration, that ran for three days, included clowns, games, gifts, singing and dancing with popcorn treats. Over 3,800 children participated in this program.

GAZA: LUNCHES FOR LEARNING

From 2009 to 2013, Mercy-USA, in partnership with the United Nations Relief and Works Agency for Palestine Refugees (UNRWA), provided daily school lunches/snacks to children in Gaza.

A residual benefit to this program was that the food items used to make the daily meals were purchased locally, which helped to create and sustain jobs and benefit the devastated Gaza economy.

During the 2012/2013 academic year, Mercy-USA’s support provided more than 1.4 million meals to 8,891 children (4,162 boys and 4,729 girls) attending 10 elementary and preparatory schools in Gaza. These nutritious meals boosted the students’ ability to focus, improved their overall nutritional status, as well as their academic performance.

Mercy-USA for Aid and Development • 2013 Annual Report
Poverty is the first enemy of a solid education. According to UNICEF, in many countries, especially in Africa, more than 30% of primary school-age children are not enrolled in large part because of hunger. Parents, struggling daily to survive may feel they have to choose between school for their children or having them be a source of income for the family doing menial labor, but if the children are provided with one or two good meals per day at school, the education becomes a vehicle for immediate and long-term benefit.

From January 2007 until December 2013, Mercy-USA distributed over 1,300 hygiene kits to families of children suffering from severe acute malnutrition admitted into our Therapeutic Feeding Program. Each kit contained three 20-liter Jerri Cans, hand-washing and bathing soap and water purification supplies.

A comprehensive training program was conducted for adults in the community through the health centers, radio programs and text messaging, while students within the community received training at their schools. Over 15,000 persons were reached through these programs.

Previously in 2012, we had constructed water storage tanks, latrines and hand-washing stations at 24 elementary and pre-schools. The children continue to have access to clean water and proper sanitation facilities and are taught vital hygiene practices reducing their risk of infectious disease.

Still reeling from a drought that devastated the Horn of Africa in 2011 and long-term severe poverty, pregnant or nursing women and children are suffering from moderate to severe malnutrition in many parts of Kenya. Through June 2013, Mercy-USA ran 200 outpatient sites and 10 inpatient locations to treat malnourished children in four counties (Garissa, Kajiado, Kwale and Mwingi) within Kenya with grant funding from the US Agency for International Development/Office of Foreign Disaster Assistance (USAID/OFDA), distributed over 1,300 hygiene kits to families of children suffering from severe acute malnutrition admitted into our Therapeutic Feeding Program. Each kit contained three 20-liter Jerri Cans, hand-washing and bathing soap and water purification supplies.

Services provided include outreach trips to more isolated villages to identify and treat malnourished children and women who would not otherwise be helped. Mercy-USA’s nutrition workers and volunteers also train the caregivers of admitted children, as well as the general community on factors that affect nutrition including diet, breastfeeding, hygiene, sanitation and access to safe water.

Diarrhea is widespread in rural Kenya, where 43% of the population gets their drinking water from nearby springs that are often contaminated by the lack of hygiene stations and adequate latrines. According to UNICEF, more than 250,000 children under the age of five die from diarrheal diseases in Africa each year.

In 2013, Mercy-USA, with grant funding from the US Agency for International Development/Office of Foreign Disaster Assistance (USAID/OFDA), distributed over 1,300 hygiene kits to families of children suffering from severe acute malnutrition admitted into our Therapeutic Feeding Program. Each kit contained three 20-liter Jerri Cans, hand-washing and bathing soap and water purification supplies.

A comprehensive training program was conducted for adults in the community through the health centers, radio programs and text messaging, while students within the community received training at their schools. Over 15,000 persons were reached through these programs.

Previously in 2012, we had constructed water storage tanks, latrines and hand-washing stations at 24 elementary and pre-schools. The children continue to have access to clean water and proper sanitation facilities and are taught vital hygiene practices reducing their risk of infectious disease.
SEASONAL FOOD AID—WORLDWIDE
Mercy-USA provides food and other essential items to families in need during Ramadan and Eid ul-Adha. Iftar food packages or Iftar meals were served, as well as food packages (Fitra) were distributed to needy families in most of the countries where we operate. Meat was distributed during Eid ul-Adha.

In 2013, Mercy-USA’s donors provided over 90,000 people with this vital food aid. Persons helped included orphans, the elderly, persons with disabilities, refugees and those living in poverty in Albania, Bangladesh, Bosnia, India, Indonesia, Kenya, Lebanon, Somalia, Syria and the United States.

THE SWEETNESS OF SERVICE AND DEVASTATION OF LOSS
Toward the end of 2013, the situation in Syria had made the Aleppo neighborhoods of Al-Marjeh, Aqyoul or Bab Al Nayreb some of the most dangerous places on earth. The daily death toll from barrel bombings were estimated to be 30 to 40 persons including children.

In the last weeks in December 2013, in the Al-Marjeh neighborhood, families—too poor to have escaped the danger earlier by traveling to another country—were stuck with few choices. They were disadvantaged even before the war began: widowed or abandoned women with children, families caring for disabled children, and the elderly. The commonality between these families is that they have all been rendered virtually helpless due to the fighting.

While the families waited for something to change, their bodies still needed food and warmth, and Mercy-USA’s local aid workers continued to deliver food baskets and baby formula. Despite the threats to their own safety, they continued to do the work to which they’ve dedicated their lives.

Abir, newly hired by Mercy-USA just a month before her death, had spent her life helping her community, and had seen her new job as a way to broaden her reach of service to the most vulnerable families and children in Aleppo. Three days after her 37th birthday, on December 23, 2013, Abir had spent the morning visiting families and assessing their need for the aid that Mercy-USA distributes in Al-Marjeh. Later that afternoon, she was killed by a barrel bomb attack as she walked down the street toward her next workday task. The news stunned Mercy-USA staff around the world, leaving everyone worried for not only Abir’s family, but also the remaining Aleppo field staff and the people of Syria.

The risk an aid worker like Abir takes in Aleppo is incredibly high. These workers are humanitarians—not soldiers or activists, and they’re risking their lives to care for the most vulnerable people. A bloody tie that binds the field staff to the people they’re helping is the war trauma they’re all experiencing. Everyone has friends or relatives who have been killed, and each day brings the horror-filled prospect of more painful news.

“It’s security chaos,” reports one of Mercy-USA’s senior staff who wishes to remain anonymous for safety reasons. “It doesn’t matter who’s who, we base our assessments on pure need. We don’t ask affiliations or religion, we only want to know if they’re hungry or destitute; and if they are, we give the aid.” This puts the workers in danger on a daily basis. Relief work has no agenda when aiding hunger and suffering, and that’s the grave risk field staff take daily.

During a field staff meeting days after Abir’s untimely death, Mercy-USA’s senior leadership team expressed concern for the worker’s safety as the situation became even more dangerous. All of the field workers said that even if the commodities Mercy-USA delivers were to dry up, they’d still stay and do what they could to help the thousands who are relying on them for help. “We’re staying. It’s our country, and these are our people. Who else will help them if we don’t?” While most of their own families fled the country long ago for safer havens, these humanitarians refuse to leave those who have no other choice but to wait for the day when life in Syria becomes once again livable.

We continue to pray for Abir and her good and generous soul.

INDEPENDENT AUDITORS’ REPORT

To the Board of Directors of
Mercy-USA for Aid & Development, Inc.
Plymouth, Michigan

Report on the Financial Statements

We have audited the accompanying consolidated financial statements of Mercy-USA for Aid and Development, Inc (the Organization) and its overseas operations, which comprise the consolidated statements of financial position as of December 31, 2013 and 2012, and the related consolidated statements of activities, and cash flows for the years then ended, and the related notes to the financial statements.

Management’s Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor’s Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Organization as of December 31, 2013 and 2012, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Supplementary and Other Information

Our audit was conducted for the purpose of forming an opinion on the consolidated financial statements as a whole. The accompanying schedule of expenditures of federal awards, as required by Office of Management and Budget Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations, statement of functional expense and other supplemental information as identified in the table of contents, are presented for purposes of additional analysis and are not a required part of the consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated, in all material respects, in relation to the consolidated financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated July 7, 2014 on our consideration of the Organization’s internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the Organization’s internal control over financial reporting and compliance.

The accompanying notes are an integral part of these financial statements.
1. **NATURE OF ACTIVITY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Nature of Activities**

Mercy-USA for Aid & Development, Inc. (the Organization) is a nonprofit organization exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code. It was incorporated in the State of Michigan on September 23, 1988. The Organization is also licensed by the States of Michigan, Illinois, New Jersey and California to solicit public funds. Mercy-USA is involved in the relief and development for individuals and communities providing economic stabilization, health care, food and water and education mainly in Kenya, Somalia, Bolivia, Indonesia, Liberia and all over the world. The Organization is also licensed by the States of Michigan, Illinois, New Jersey and California to solicit public funds. It provides the structure necessary to encourage and secure support from individuals and communities worldwide. The improvement of attendance and academic performance, especially among girls, includes the operation of funding of clinics, hospitals, and other health care institutions; the provision of medicines, medical supplies and medical equipment to health care facilities; and the provision of technical training especially to orphan and other vulnerable children and youth.

**Statement of Activities**

The Organization is required to report information regarding its financial position and activities according to three classes of net assets: unrestricted net assets, temporarily restricted net assets, and permanently restricted net assets. In accordance with accounting standards applicable to not-for-profit organizations, the Organization is required to report information regarding its financial position and activities accepting that cash flows related to transactions that impact cash flow and are treated as such that do not. Financial Statement Presentation

In accordance with accounting standards applicable to not-for-profit organizations, the Organization is required to report information regarding its financial position and activities according to three classes of net assets: unrestricted net assets, temporarily restricted net assets, and permanently restricted net assets. To ensure proper usage of restricted and unrestricted assets, the Organization continually monitors and evaluates its budget, program and intermediary costs. All assets, liabilities, and net assets are accounted in accordance with specified restrictions and objectives. The Organization’s funds are described below and are placed in the following categories:

**Unrestricted Fund**

Unrestricted net assets are those currently available for use by the Organization.

**Temporarily Restricted Fund**

Temporarily restricted net assets are those assets received with donor stipulations that limit the use of the donated assets. When stipulations/restrictions expire or purpose restrictions are accomplished, these assets are released as unrestricted net assets and reported in the Statement of Activities as net assets released from restrictions.

**Permanently Restricted Fund**

Temporarily restricted net assets are those assets received with donor stipulations that limit the use of the donated assets. When stipulations/restrictions expire or purpose restrictions are accomplished, these assets are released as unrestricted net assets and reported in the Statement of Activities as net assets released from restrictions.

**Contributions**

Contributions received are recorded, temporarily restricted or permanently restricted depending on the existence or the nature of any donor restrictions. Contributions received are immediately recognized as revenue until the donor restrictions are released. Contributions include both cash contributions and non-cash gifts. Non-cash gifts are valued at fair market value on the date of receipt.

**Operating Expenses**

Operating expenses are recognized in the statement of activities in the period in which they are incurred. The purpose of providing various programs and other activities has been summarized in a program basis in the statement of activities. Costs are allocated between fund raising, management and general and the appropriate program based on the relative benefits. Management and general expenses include those expenses that are not directly identifiable with any specific function but provide the overall support and direction of the Organization.

**Cash and Cash Equivalents**

Cash and cash equivalents include cash on hand and cash in checking and savings accounts. For financial statement purposes, cash and cash equivalents in excess of $250 and government funds are classified as cash equivalents. Cash equivalents are carried at cost, which approximates market value.

**Fixed Assets**

Fixed assets are stated at cost if purchased or, at fair market value when received as contributions. Depreciation is provided on a straight-line basis over the estimated useful life of the assets. Costs of normal repair and maintenance that do not add to the service lives of the assets are not capitalized. Assets with an individual cost of $250 and over are capitalized.

**Use of Estimates**

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions. This will affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

**Changes in Accounting Principles**

The Organization may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

**Contributions Receivable**

Contributions receivable are reported at the present value of their net realizable value, using risk-free interest rates applicable to the year in which the pledge is received.

**Contributions**

Contributions received are immediately recognized as revenue until the donor restrictions are released. Contributions include both cash contributions and non-cash gifts. Non-cash gifts are valued at fair market value on the date of receipt.

**Permanently Restricted Fund**

The improvement of attendance and academic performance, especially among girls, includes the operation of funding of clinics, hospitals, and other health care institutions; the provision of medicines, medical supplies and medical equipment to health care facilities; and the provision of technical training especially to orphan and other vulnerable children and youth.

**Management and General**

Includes the services necessary to maintain an adequate working environment, provide personnel administrative support for the Organization’s programs, and manage the financial and budgeting responsibilities of the Organization.

**Fundraising**

Provides the structure necessary to encourage and secure support from individuals and organizations.
Mercy-USA for Aid & Development, Inc.

Notes to Financial Statements (Continued)
December 31, 2013 and 2012

4) CONTRIBUTIONS IN-KIND
These consist of medical and medical supplies etc. provided by UNICEF and World Food Program for distribution to needy people. The amounts recognized in the statement of activities are based on fair value of the grants received at the time of receipt. The Organization received $179,723.176 and $2,099,922 in fiscal years 2013 and 2012, respectively.

5) PLEDGES AND ACCOUNTS RECEIVABLE
Accounts receivable consist of Smithsonian grant funding receivable from the USAID and the United Nations, Grant agencies. Details of Accounts Receivable as of December 31, 2013 and 2012 are as follows:

<table>
<thead>
<tr>
<th></th>
<th>2013</th>
<th>2012</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grants Receivable</td>
<td>$1,792,176</td>
<td>$2,099,922</td>
</tr>
<tr>
<td>Pledges Receivable</td>
<td>134,878</td>
<td>21,415</td>
</tr>
<tr>
<td>Total</td>
<td>$1,927,054</td>
<td>$2,321,337</td>
</tr>
</tbody>
</table>

During the year, $164,162 was written off as uncollectible.

6) FIXED ASSETS
Fixed assets are comprised of the following:

<table>
<thead>
<tr>
<th></th>
<th>2013</th>
<th>2012</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>$820,500</td>
<td>$603,000</td>
</tr>
<tr>
<td>Office Equipment</td>
<td>$157,125</td>
<td>$133,563</td>
</tr>
<tr>
<td>Automobiles</td>
<td>$93,629</td>
<td>$75,129</td>
</tr>
<tr>
<td>Total</td>
<td>$1,071,254</td>
<td>$862,584</td>
</tr>
</tbody>
</table>

Depreciation for the year ended December 31, 2013 and 2012 was $73,656 and $70,686 respectively.

7) PENSION PLAN
The Organization started a 401(k) pension plan on January 1, 1999 for all employees in the United States, at the same time the plan was started for all employees in Canada. Employees are eligible for the plan after the completion of one year of service. The employer provides a 50% match on eligible employee contributions to the plan up to a maximum allowable by the plan. The Organization contributed $11,183 and $10,682 in fiscal years 2013 and 2012, respectively, to the plan.

8) RELATED PARTY TRANSACTIONS
The Organization operates with Mercy-USA for Aid & Development, Canada to maximize relief and development activities. For the years ended December 31, 2013 and 2012 the Organization collected $46,136 and $46,786 respectively, on behalf of Mercy-USA for Aid & Development, Canada and received $50,426 and $47,300 respectively, from Mercy-USA for Aid & Development, Canada. As at December 31, 2013 and 2012, respectively, any balance due to Mercy-USA for Aid & Development, Canada was immaterial.

9) TEMPORARILY RESTRICTED NET ASSETS
Net assets were released from donor restrictions by incurring expenses satisfying the purpose specified by donors as follows:

<table>
<thead>
<tr>
<th>Purpose Restriction Accomplished</th>
<th>2013</th>
<th>2012</th>
</tr>
</thead>
<tbody>
<tr>
<td>Albania Programs</td>
<td>$67,659</td>

<tr>
<td>Other Programs</td>
<td>$1,564</td>
<td></td>
</tr>
<tr>
<td><strong>Total Restrictions Released</strong></td>
<td>$8,038,980</td>
<td></td>
</tr>
</tbody>
</table>

Temporarily restricted net assets are available for specific programs and have a balance of $2,127,157 and $2,169,952 at December 31, 2013 and 2012 respectively.

10) CONTINGENCY
The Organization is the recipient of several grants. The expenditures for each program are subject to audit by appropriate agencies. Any disallowed claims, including amounts already collected, may constitute a liability. The amount, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the Organization expects such amounts, if any, to be immaterial.

11) SUBSEQUENT EVENTS
The Organization has evaluated events through July 7, 2014 the date that the accompanying financial statements were available to be issued. No significant subsequent event was noted that required adjustment or disclosure in the financial statements.

Since the end of the year, the Organization has established an office in Turkey.
